

PRICE REVOLUTION!

In the hands of livestock and plant breeders, whole genome sequencing and Metagenomics can be a catalyst for innovation. Those approaches provides the insights and precision needed for improving productivity, to meet the growing demands for food production, sustainability, and resilience in the face of evolving challenges.

UNLOCK THE POWER OF GENOMICS

At Eurofins Genomics, we provide cutting-edge sequencing solutions tailored to your specific research needs, whether you're in industry or academia. Our services, powered by the MGI T7 platform (2x150bp), deliver high-quality data with the precision you expect, ensuring comprehensive insights into your samples at competitive pricing.

DNBSEQ-T7

	30X Whole Genome Sequencing (WGS) perfect for comprehensive genomes analysis			Metagenomics – Reveal the complexity of microbial communities with deep metagenomic insights
Specifications	3 Gb genome	1 Gb genome	0.5 Gb genome	10M Read Pairs
Price	€ 299,00	€ 149,00	€ 99,00	€ 79,00
Volumes conditions	48 samples	48 samples	96 samples	96 samples

KEY BENEFITS

- » **Suitable for various genomes:**
Optimal for plants, livestock, aquatic species, and companion animals.
- » **Denmark-Based Processing:**
Our state-of-the-art facility ensures high-quality results with a personalized touch.

- » **Fast Turnaround Time:**
Standard delivery in 4 weeks (for full flow cells), with the option for faster processing.
- » **Cost-Effective Solutions:**
Designed for clients seeking an affordable alternative to high Illumina costs.
